-------	-----------------	---------------------------

Free registration is made possible through the generous support of the Municipal Asset Management Program, which is delivered by the Federation of Canadian Municipalities and funded by the Government of Canada. Although tickets are free, each municipality with staff participating must complete an asset management benchmarking exercise. This is fulfilled by completing and submitting an Asset Management Readiness Scale (<https://fcm.ca/en/resources/mamp/tool-asset-management-readiness-scale>) in early 2021 and again in Sept. 2021 to assess progress. Only one AMRS needs to be completed per municipality.

Completed Asset Management Readiness Scales should be emailed to:
