

Asset Management Community of Practice Meeting

The purpose of this meeting is to provide a forum for municipalities to share effective practices for asset management in an informal and supportive environment. There will also be an opportunity to learn from experienced practitioners about building a strong municipal asset management culture, linking climate change considerations with asset management, and setting levels of service for parks/recreation facilities.

This workshop is free for municipal staff who directly or indirectly work on asset management. We encourage cross-functional representation, including: treasurers, public works staff, engineers, planners, administrators, and corporate asset managers.
